### ORDER TO CARRY OUT REMEDIATION WORK UNDER SECTION 11.15 OF THE BIODIVERSITY CONSERVATION ACT 2016

# Basis for issuing Remediation Order

The Department of Planning, Industry and Environment (the Department) is responsible for the enforcement of the Biodiversity Conservation Act 2016 (BC Act), its associated regulations and Part 5A of the Local Land Services Act 2013 (LLS Act) and the regulations under that part.

Information and evidence obtained to date, including an assessment of aerial / satellite imagery and a vegetation assessment supports that **damage**, caused by **clearing** 80 remnant paddock tree areas (the **Areas of interest** mapped at **Attachment A**) occurred on the Property between January 2020 and January 2021.

At all material times, it was an offence against section 60N of the LLS Act for a person to clear native vegetation, except in accordance with:

- allowable activities authorised under Division 4 and Schedule 5A
- clearing authorised by a land management (native vegetation) code under Division 5
- clearing authorised by an approval of the Panel under Division 6
- clearing authorised under section 60O (clearing authorised under other legislation)
- clearing is a forestry operation authorised under Part 5B (Private Native Forestry)

# Purpose

Under the BC Act the Environment Agency Head (or delegate) may order a person to carry out specified remediation work or achieve a specified remediation outcome in response to damage caused by the commission of certain environmental offences.

The purpose of this Remediation Order is to remediate the area of interest to be consistent with the set aside and revegetation requirements under Part 6 Division 1 of the Land Management (Native Vegetation) Code 2018.

# Opinion

I, Senior Team Leader, North West Compliance and Regulation (STL NWCR), am satisfied that native vegetation has been damaged in or as a result of the commission of an offence against section 60N of the LLS Act.

# Order

Pursuant to section 11.15 of the BC Act and under delegation from the Environment Agency Head, I, **Example 1**, STL NWCR, order **Example 2** (the **Remediator**) to carry out the following remediation work for the duration specified.

# Requirements

## 1. Remediation Areas

- 1.1. In this Order, **Remediation Areas** means the areas marked "Remediation Areas" on **Attachment B**.
- 1.2. This Order requires the Remediator to inform the Environment Agency Head of any change in the ownership or occupancy of the land concerned at least 21 days prior to any such change occurring.
- 1.3. "Remediation Area Remnant Vegetation" relates to an area of remnant vegetation (10 ha) on as marked on **Attachment B**.
- 1.4. "Remediation Area B Revegetation" relates to two areas (2000 areas (2000 areas)) of 25 metres wide x 2000 metres long on the eastern and western sides of the proposed Inland Rail corridor as marked on **Attachment B**.

## 2. Duration

- 2.1. This Order will be in force for twenty (20) years from the date of issue; unless varied or revoked in accordance with the BC Act.
- 3. Remediation work

#### Soil disturbance

3.1. Soil disturbance in the Remediation Areas is prohibited, except in accordance with written approval from the Department.

#### Remediation

- 3.2. Revegetation is required in the areas marked "Remediation Area Revegetation" on **Attachment B** for the species and rates prescribed in **Attachment C**.
- 3.3. The process of revegetation within the areas marked "Remediation Area Revegetation" is to commence within six (6) months of the completion of the proposed Inland Rail corridor.
- 3.4. The Remediator is to notify the Department of the completion of the proposed Inland Rail corridor and the commencement of revegetation with the specific Remediation Areas.
- 3.5. Remnant vegetation in the areas marked "Remediation Area Remnant Vegetation" on **Attachment B** is to be managed in accordance with section 3.4 through section 3.16 of this Order.

#### Weed management

- 3.6. The Remediators must implement measures to ensure **exotic flora** do not have a significant impact on the **biodiversity values** of the Remediation Areas.
- 3.7. Without limiting this clause, the Remediators must ensure that exotic flora occupy less than 5% of total groundcover of the Remediation Areas. Control measures permitted include:
  - Spot application of herbicide
  - Manual removal

• Biological control.

#### Pest animals

3.8. The Remediators must implement measures to reduce the density of **exotic animals** to a level that is not having a significant impact on the biodiversity values of the Remediation Areas; and maintain densities at or below that level using any approved means.

#### Livestock

3.9. The Remediators must implement measures to keep the Remediation Areas free of **stock**, except in accordance with a **sustainable grazing** regime approved by the Department.

#### Fire

3.10. The Remediators must implement measures to prevent fire occurring within the Remediation Areas and to suppress and extinguish any fire that does occur.

#### Fencing

- 3.11. Fences are to be maintained to ensure the exclusion of stock from the Remediation Areas.
- 3.12. If the Remediators wishes to continue grazing rights within the land outside the Remediation Areas, the boundaries of the defined Remediation Areas must be fenced to a standard that excludes stock.
- 3.13. The Remediators must erect signage so that any person entering the Remediation Areas is aware; and does not use the land in a manner that would contradict this Order.

#### Access

- 3.14. The Remediators must provide reasonable access to staff of the Department for the purposes of administering this Order.
- 3.15. The Department must provide reasonable notice of an intention to inspect the Remediation Areas.

#### Hazards, chemicals and waste

- 3.16. The use of insecticides, herbicides and soil ameliorants is not permitted on the Remediation Areas except as approved in writing by the Department.
- 3.17. Waste is not to be placed, stored or kept in the Remediation Areas.
- 3.18. All staff, contractors and other visitors entering the Remediation Areas are to be made aware of this Order and instructed to comply with its requirements.

#### Costs

- 3.19. The Remediators must bear all costs associated with implementing the conditions of this Order.
- 4. Inspections and records

#### Inspections

- 4.1. The Remediator/s must inspect the Remediation Areas twice each year, with a minimum of 150 days between each inspection for the purposes of determining the percentage of ground cover that is comprised of **exotic flora** and priority weeds.
- 4.2. In the Remediation Areas, there are six monitoring points located at the GPS coordinates given in **Table 2** and mapped at **Attachment B**. The co-ordinates given must be permanently marked to ensure the location is the same each monitoring period.

#### Table 1: Location of monitoring points

Monitoring Point	Latitude	Longitude	Easting	Northing
Monitoring Point 1				
Monitoring Point 2				
Monitoring Point 3				
Monitoring Point 4				

#### Records

- 4.3. The following records must be made by the Remediator for all inspections:
  - The date(s) on which the inspection was undertaken
  - The name of the person who undertook the inspection
  - Photographs to the north, east, south and west at each monitoring point
    - Observations made during the inspection including:
      - Percentage of ground cover comprised of weeds
      - Presence or absence of pest animals in the Remediation Areas
      - Risk of fire within the Remediation Areas.
  - Details of any remediation work required within the Remediation Areas, including condition targets
  - The proposed date(s) of that work and time frames for completion.
- 4.4. All records required to be kept by this Order must be:
  - Accurate
  - In a legible form
  - Kept for the duration of this Order
  - Provided to the Department annually.

#### 5. Reporting

#### Initial works report

- 5.1. The Remediators must prepare and submit an Initial Works Report to the Department within six weeks of the date of issue of this Order. This report must contain:
  - Confirmation of the exclusion of stock and dates of any actions taken to remove stock.
  - The percentage of ground cover that is comprised of exotic flora and priority weeds.
  - An assessment of pest animal presence within the Remediation Areas.
  - Advice of any completed, required, or proposed work within the Remediation Areas.

#### Annual monitoring report

- 5.2. A Monitoring Report must be submitted to the Department annually whilst this Remediation Order is in force. The initial report is due twelve (12) months from the date of issue and annually thereafter. Monitoring Reports must contain the records made for all inspections (see clause 4.3).
- 5.3. Reports may be submitted to the Department by:
  - Mail, courier, or hand to:

Compliance and Regulation Unit Biodiversity and Conservation North West Level 1, 48-52 Wingewarra Street P.O. Box 2111 Dubbo NSW 2830

# Definitions

Term	Definition		
Areas of interest	Areas where native vegetation has been cleared		
Clearing	Has the same meaning as defined in the Local Land Services Act 2013		
Damage	Damage has the same meaning as defined in section 11.14 of the <i>Biodiversity Conservation Act 2016</i>		
Exotic animals	Includes feral cats, wild dogs, feral pigs, feral goats, feral deer, foxes, hares, rabbits, and other exotic animal species but does not include livestock or native wildlife		
Exotic flora	Plant species that are not "native vegetation" as defined in the <i>Local Lanc Services Act 2013</i>		
Native vegetation	Has the same meaning as defined in the Local Land Services Act 2013		
Order	This document – a Remediation Order issued under section 11.15 of the <i>Biodiversity Conservation Act 2016</i>		
PCT	Plant Community Type		
Remediation Areas	The areas located on the Property shown schematically on the map i <b>Attachment B</b> and marked "Remediation Areas"		
Stock	Means all livestock (including, but not limited to, cattle, horses, sheep alpacas, domesticated pigs and domesticated goats); it does not include native wildlife		
Sustainable grazing	Sustainable grazing is grazing by livestock, and the management grasslands used for grazing, that is not likely to result in the substanti long-term decline in the structure and composition of native vegetation		
Threatened Ecological Community	Has the same meaning as defined in the <i>Biodiversity Conservation Act</i> 2016		
Waste	Has the same meaning as defined in the <i>Protection of the Environmen Operations Act 1997</i>		

In this Order, the following definitions apply:

## Information about this Order

**Compliance:** this order takes immediate effect from the date of issue. Your obligation to comply with the requirements of this Order continues until the Order is complied with, even if the due date for compliance has passed.

Failure to comply - It is an offence against section 11.22 of the BC Act to contravene this Order without reasonable excuse or to intentionally obstruct anyone carrying out remediation work under this Order.

Alternatively, the Environment Agency Head (or Delegate) may authorise another person to carry out the work who may then recover the cost from you or any person may seek an order from the NSW Land and Environment Court requiring you to rectify the breach.

**Appeal:** Section 11.23(1) of the BC Act allows for a person given a remediation order to appeal against the giving of the Order (or any terms of the Order) to the NSW Land and Environment Court within 30 days of the service of the Order. However, even if an appeal is lodged, you must comply with this Order, unless the Court orders otherwise. More information on appeals found NSW can be on the Land and Environment Court website http://www.lec.justice.nsw.gov.au.

Variation: This order may be varied or revoked in the same manner in which it was given.

## **Attachment C: Revegetation requirements**

## Woody Vegetation

Woody vegetation is to be planted at a minimum rate of 30 trees per hectare comprising the following species. The revegetation area shall comprise two 25m by 2000m corridors (total area 10 ha).

- Poplar Box (Eucalyptus populnea subsp. bimbil)
- Western Grey Box (*Eucalyptus mircrocarpa*)
- Kurrajong (*Brachychiton populneus*)
- Buloke (Bull-oak) (Allocasuarina luehmannii) or Belah (Casuarina cristata)

## Endemic grasses

To reduce the likelihood of exotic flora / weed invasion and to promote soil stability, native groundcover species will be allowed to regenerate within the remediation areas. If groundcover species fail to regenerate sufficiently or exotic flora/weeds be prominent within the Remediation Areas, endemic native groundcover species are to be sown at >75% total groundcover per hectare in the Remediation Areas.
